

I'm not robot!

## Specifications

FORTIGATE 200E		FORTIGATE 201E	
<b>Hardware Specifications</b>			
GE RJ45 Network Interfaces	2		
GE RJ45 Management/VA Ports	2		
GE RJ45 Ports	14		
GE SFP Slots	4		
USB port	1		
Console (RJ45)	1		
Local Storage	—	1x 6GB QD SSD	
Included Transceivers	0		
<b>System Performance — Enterprise Traffic Mix</b>			
IPS Throughput <sup>1</sup>	2.7 Gbps		
NAT Throughput <sup>1*</sup>	1.0 Gbps		
Threat Protection Throughput <sup>1*</sup>	1.7 Gbps		
<b>System Performance</b>			
Firewall Throughput (1518/1522/154 byte UDP packets)	20/20/19 Gbps		
Firewall Latency (64 byte UDP packets)	3 µs		
Firewall Throughput (Packets Per Second)	13.5 Mpps		
Connection Sessions (TCP)	718K		
New Sessions/Second (TCP)	136,000		
Firewall Policies	10,000		
IPsec VPN Throughput (512 byte <sup>1</sup> )	9 Gbps		
Gateway-to-Gateway IPsec VPN Tunnels	7,000		
Client-to-Gateway IPsec VPN Tunnels	10,000		
SSL VPN Throughput	900 Mbps		
Concurrent SSL VPN Users	900		
Proxymodified Maximum Tunnel Model	—		
SSL Inspection Throughput (IPS, avg. HTTPS) <sup>1</sup>	600 Mbps		
SSL Inspection CPS (IPS, avg. HTTPS) <sup>1</sup>	1,000		
SSL Inspection Concurrent Session (IPS, avg. HTTPS) <sup>1</sup>	240,000		
Application Control Throughput (HTTP 64K) <sup>1</sup>	3.5 Gbps		
CAMMP Throughput (1444 byte, UDP)	1.5 Gbps		
Virtual Domains (Default) Maximum	10/10		
Maximum Number of FortiSwitches Supported	24		
Maximum Number of FortiAPs (Split Tunnel Mode)	120/144		
Maximum Number of FortiSensors	6,000		
Maximum Number of Registered FortiClients	600		
High Availability Configurations	Active/Active, Active/Passive, Clustering		
<b>Dimensions</b>			
Height x Width x Length (inches)	1.75 x 17.0 x 11.9		
Height x Width x Length (mm)	44.45 x 432 x 301		
Weight	11.9 lbs. 6.4 kg	12.12 lbs. 6.5 kg	
Form Factor	Back Mount, 1 RU		
<b>Environment</b>			
Power	500, 240W AC, 20, 601W		
Maximum Current	130V/1A, 220V/0.62A		
Power Consumption (Average / Maximum)	15.0W / 109.9W		
Heat Dissipation	37.43 BTU/hr		
Operating Temperature	32-50°C (90-122°F)		
Storage Temperature	-31-160°F (-35-100°C)		
Humidity	10-90% non-condensing		
Noise Level	31.5 dBA		
Shielding Method	EMC/RFI/EMI/RFI/ESD/ESD		
Compliance	FCC Part 15B, Class A, CE, RoHS, WEEE, REACH, OTC, IEC60950		
Certifications	CE, FCC Part 15B, Class A, CE, RoHS, WEEE, REACH, OTC, IEC60950		

Note: All performance values are "up to" and vary depending on system configuration.

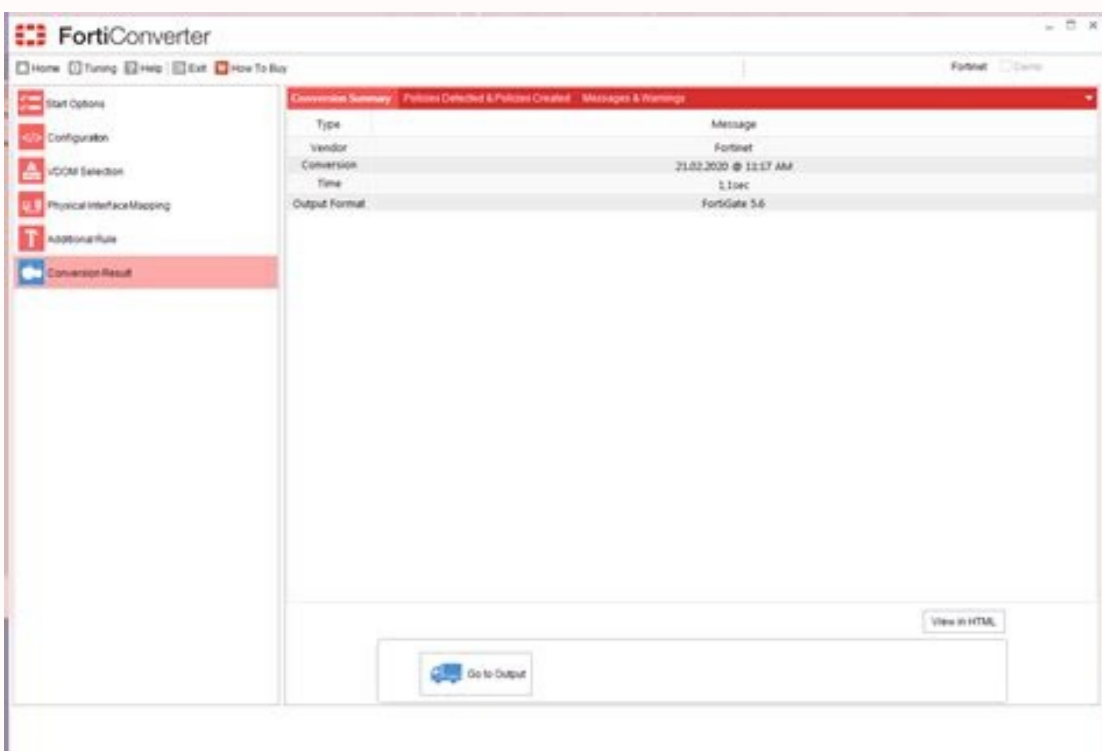

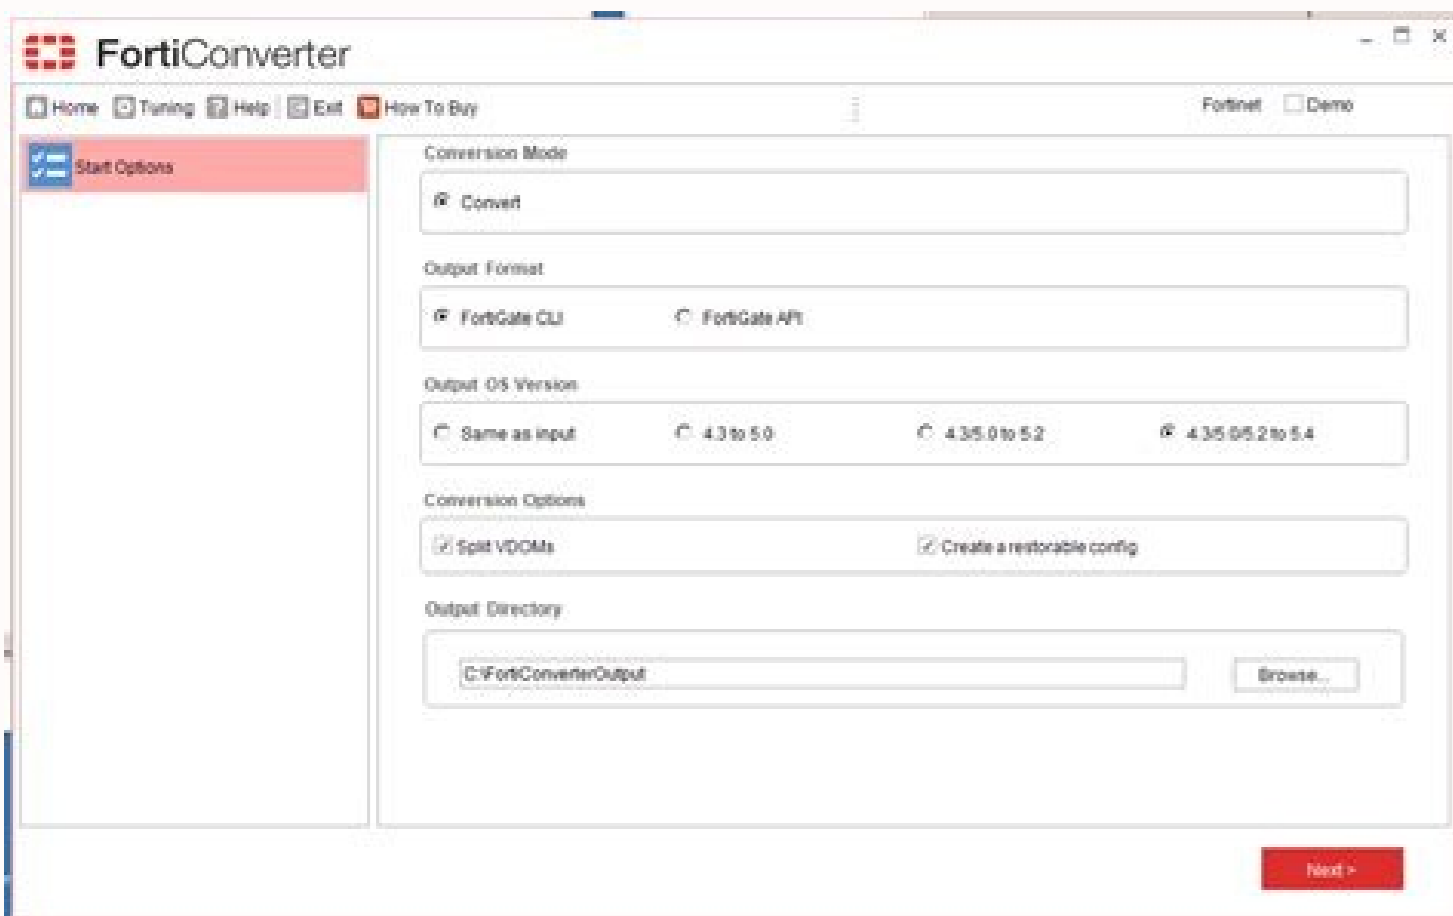

1. Peak VPN performance test uses 1024x1024x256.

2. IPS Enterprise SaaS, Application Control, NAT, and Threat Protection are measured with logging enabled.

3. SSL Inspection performance values are an average of 100 HTTPS sessions of different cipher suites.

4. NAT performance is measured with Firewall, IPS and Application Control enabled.

5. Threat Protection performance is measured with Firewall, IPS, Application Control and Malware Protection enabled.

Fortigate 200e configuration guide.pdf.

In this case, NAT/Route mode is used which allows FortiGate to hide the IP addresses of the private network using network address translation (NAT). NAT mode is the most commonly used operating mode for a FortiGate. Transparent vs NAT/Route mode A FortiGate unit can operate in one of two modes: Transparent or NAT/Route mode. In Transparent mode, the FortiGate is installed between the internal network and the router. In this mode, the FortiGate does not make any changes to IP addresses and only applies security scanning to traffic. When a FortiGate is added to a network in Transparent mode, no network changes are required, except to provide the FortiGate with a management IP address. Transparent mode is used primarily when there is a need to increase network protection but changing the configuration of the network itself is impractical. In NAT/Route mode, a FortiGate unit is installed as a gateway or router between two networks. This allows the FortiGate to hide the IP addresses of the private network using network address translation (NAT). More at: Login to the FortiGate's web-based manager Log in using an admin account. The default admin account has the username admin and no password. Configure the internal and WAN interfaces Go to system -> Network -> Interfaces Configure the WAN interface Configure the internal interface In this case DHCP is enabled In the MAC Address Access Control List, assign the mac address and IP address of the administrator PC Review the Configuration Configure default route at Router -> Static -> Static Routes Set the Destination IP/Mask to 0.0.0.0/0.0.0.0. The device to the Internet-facing interface, and the Gateway to the gateway (or default route) provided by your ISP or to the next hop router, depending on your network requirements. Review configuration Configure DNS Setting you can keep the default if you want to Configure Policies Two policies are created in this scenario General policy - restricted internet access Administrator PC policy - unrestricted internet access can be given General Policy Only HTTP, HTTPS, DNS services are allowed Enable NAT and session logging Administrator PC policy Firstly you have to create a new address for admin PC at Firewall Objects -> Address appropriate subnet number and the interface is configured Review created address Then create the policy for admin PC. All the services are allowed in this case Test the policy configuration by accessing internet using the admin PC and another PC in the network. Monitor the counter changes in policies SSL or Client VPNs are used to grant VPN access to users without an enterprise firewall, such as remote workers or employees at home. This article details an example SSL VPN configuration that will allow a user to access internal network infrastructure while still retaining access to the open internet. VPN Configuration Connect to the FortiGate VM using the Fortinet GUI. To configure the network interfaces: Go to Network > Interfaces and edit the wan1 interface. Set IP/Network Mask to 172.20.120.123/255.255.255.0. Edit port1 interface (or an interface that connects to the internal network) and set IP/Network Mask to 192.168.1.99/255.255.255.0. Click OK. Go to Policy & Objects > Address and create an address for internal subnet 192.168.1.0 Configure user and user group: Go to User & Device > User Definition to create a local user sslvpnuser1. Go to User & Device > User Groups to create a group sslvpngroup with the member sslvpnuser1. Configure SSL VPN web portal (optional): Go to VPN > SSL-VPN Portals to create a tunnel mode only portal my-split-tunnel-portal. Enable Split Tunneling. Select Routing Address to define the destination network that will be routed through the tunnel. Leave

undefined to use the destination in the respective firewall policies. Go to VPN > SSL-VPN Settings. For Listen on Port to 10443. Optionally, set Restrict Access to specific hosts, and specify the addresses of the hosts that are allowed to connect to this VPN. Choose a certificate for Server Certificate. The default is Fortinet\_Factory. In Authentication/Portal Mapping All Other Users/Groups, set the Portal to tunnel-access. Create new Authentication/Portal Mapping for group sslvpngroup mapping portal my-split-tunnel-portal. Configure SSL VPN firewall policy: Go to Policy & Objects > IPv4 Policy. Fill in the firewall policy name. In this example, sslvpn split tunnel access. Incoming interface must be SSL-VPN tunnel interface(ssl.root). Choose an Outgoing Interface. In this example, port1. Set the Source to SSLVPN\_TUNNEL\_ADDR1 and group to sslvpngroup. The source address references the tunnel IP addresses that the remote clients are using. In this example, the Destination is 192.168.1.0. Set Schedule to always, Service to ALL, and Action to Accept. Click OK. Connecting as a User To connect to the FortiGate SSL VPN as a user, first download the client from . Then, set the FortiGate's external IP as your connection point and enter your user credentials. Note that the above instructions configure the SSL VPN in split-tunnel mode, which will allow the user to browse the internet normally while maintaining VPN access to corporate infrastructure. Fortinet ProductsFortiGate 200E Base ApplianceFortinet FortiGate 200E Firewall18 x GE RJ45 (including 2 x WAN ports, 1 x MGMT port, 1 X HA port, 14 x switch ports), 4 x GE SFP slots.
